# RUMAIS P P

## SOFTWARE ENGINEER

React — Next.js — Node.js — Python  
AI Applications  
**AVAILABLE IMMEDIATELY**

## PROFESSIONAL SUMMARY

Entry-Level Software Engineer and BCA graduate with hands-on experience building modern web applications using React, Next.js, Node.js, Express.js, and Python. Skilled in frontend development, REST APIs, authentication workflows, SQL, databases, and AI-powered application features. Strong foundation in OOP, Git, DBMS, and modern software development with a focus on secure and user-focused applications.

## TECHNICAL SKILLS

**Programming:** Python, JavaScript, TypeScript, SQL

**Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS

**Backend:** Node.js, Express.js, Next.js API Routes, REST APIs

**Databases:** PostgreSQL, MongoDB, Firebase Firestore, Supabase

**Authentication & Tools:** JWT Authentication, Firebase Authentication, Git, GitHub

**Cloud & AI:** Google Cloud Vision AI, Generative AI Fundamentals, Firebase, Vercel

**Additional Knowledge:** Redis, Docker Fundamentals, Kubernetes Fundamentals, OOP, DBMS, Data Structures

## EXPERIENCE

**Freelance Web Developer — Heal Sugar**

2026 (3 months)

*Shopify — Liquid — HTML — CSS — JavaScript*

- Contributed to the development and customization of a Shopify e-commerce website for Heal Sugar.
- Worked on storefront UI improvements, theme customization, responsive layouts, and product presentation.
- Implemented frontend updates aligned with the brand's visual style and e-commerce requirements.

## PROJECTS

**PORTFI - Interactive Portfolio Generator**

GitHub — Live Demo

*Next.js — React — TypeScript — Tailwind CSS — Framer Motion*

- Built an interactive portfolio generator with a multi-step form for collecting professional information and portfolio content.
- Implemented a real-time portfolio preview using React state, refs, ResizeObserver, and CSS scaling.
- Developed a client-side generator that converts user data into downloadable, self-contained HTML portfolio files.

**DATIE - Secure Dating Platform**

GitHub — Live Demo

*Next.js — React — TypeScript — Firebase — Firestore — Redis — Google Cloud Vision AI*

- Developed security-focused features for a dating platform using Next.js, Firebase, and server-side API routes.
- Implemented email-based OTP verification and authentication workflows using Firebase and SMS services.
- Integrated Google Cloud Vision AI SafeSearch to support automated moderation of uploaded profile images.
- Built chat safety features including profanity filtering, malicious link detection, and user blocking functionality.

**EDUSPHERE - E-Learning Platform Frontend Prototype**

Academic Team Project

*React — Vite — Tailwind CSS — React Router DOM*

- Contributed to a responsive frontend prototype for browsing and exploring online courses.
- Worked on the Student Module, including navigation, course browsing, course details, and authentication UI.
- Built reusable React components and implemented client-side routing across multiple application views.

## EDUCATION

**Bachelor of Computer Applications (BCA)**

2026

SES College, Sreekandapuram - Kannur University

CGPA: 7.79 / 10

**Higher Secondary Education - Computer Science**

2023

Sacred Heart Higher Secondary School, Payyavoor

Percentage: 80.5%

## CERTIFICATIONS

**The Basics of Google Cloud Compute - Google Skills**

**Introduction to Generative AI for Software Development - Coursera**
